

## Tutorial 6 - Testing

- 1) Add the following methods to the `IMoney` class from the notes:

```
/**
 * return money multiplied by k
 */
IMoney multiply(int k);

/**
 * return money divided by k
 */
IMoney divide(int k);
```

- 2) Provide implementations for these methods to `Money` and `MoneyBag`.
- 3) Add tests to `MoneyTest` and `MoneyBagTest` to test your implementations.
